

Netgear Prosafe

Using HTTP(S)

We would recommend using HTTPS rather than HTTP for transferring your devices configuration as the latter provides no encryption. The procedure for getting the configuration from the device using HTTP(S) is as follows:

1. Using your favorite web browser, connect to the HTTP(S) service provided by your Netgear Prosafe for remote management. You can do this by entering "https://" (recommended) or "http://" followed by your devices IP address.
2. Logon using your administration username and password /passcode.

3. Click Administration followed by Settings Backup & Upgrade

4. Click backup and then OK to save the configuration file.
